Item # _____

Job _____

STARSYS® ECMO Cart

Critical supplies must be immediately accessible for every ECMO patient, both for routine care and in case of emergencies.

Efficiency – The tall Starsys ECMO cart provides high density storage in a small footprint that can be staged inside or just outside the patient's room for quick and easy access to items needed to support the patient.

Access & Organize – Contents are visible through the door on this preconfigured cart and there is plenty of storage both for smaller items in full extension totes with optional dividers, as well as, larger, bulkier items on the shelves.

Mobility – The handle and easy rolling casters provide for quiet movement in patient care environments for replenishment and to position at the point of care.

Readiness – The Starsys ECMO cart enables staff to have a dedicated "situation ready" cart that is prepared and stored ahead of time, ready for use.

Protection – Contents can be stored behind the door of this enclosed cart preventing loss and reducing risk of contamination.

Utility – Cart also provides a large writing/prep surface that can be stowed when not needed increasing the overall utility of the cart.

Modularity – Polymer shelving and full extension, removable totes that comprise behind the door storage are completely reconfigurable within the cart. Place contents in the organized manner best suited to your specific needs.

Job _____

STARSYS® ECMO CART

STARSYS ECMO (ExtraCorporeal Membrane Oxygenation) Cart
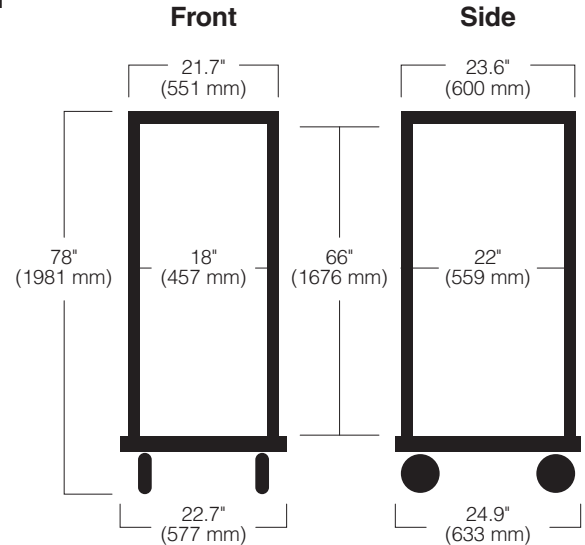

Starsys ECMO Cart provide over 18 CU. FT. of enclosed storage volume and plenty of items to assist in the content organization both inside and outside on the cart including:

Cart Construction
- Highly cleanable, durable, polymer construction prevents damage from impact or harsh environmental exposure in use.
- Polymer components include Microban® antimicrobial product protection to keep surfaces cleaner between cleanings.
- 5" (127mm) diameter easy rolling, quiet, hospital grade casters – 2 total locking in front to keep cart/contents stable when placed and 2 positional locking to greatly assist when cart/contents are being moved into position.
- Clear view, full height door allowing for visual access to contents.
- Polymer inner panels allow for easy repositioning of totes and shelves.
