

STARSYS™ SYSTEM SECURE I.V. CART

The Starsys Secure I.V. Cart is a system of polymer components that offers security in a flexible storage solution.

- **Comprehensive System:** Two different sized carts are constructed from a combination of polymer components.
- **Increases Productivity:** Removable totes allow for the creation of an inventory replacement system with prestocked totes. Polymer construction prevents damage to products which results in additional work and cost.
- **Easily Accessible:** Full extension shelves allow for solution bags to be stored standing up or lying down while providing complete access to all of the product.
- **JCAHO Standards Compliant:** The locking feature is in compliance with the Joint Commission's medication storage standards.
- **Visible Security:** A locking clear door provides for visual inventory while contents are secure.
- **Enclosed Protection:** Solid enclosure panels and a door protects contents from splashes or other potential contamination.
- **Corrosion Resistant:** Constructed of durable corrosion-proof polymer panels that are easy to clean — won't chip, rust, or dent.
- **Easily Maneuverable:** The 60" (1525mm) height, lighter polymer design and 5" (127mm) casters allow for easier, safer transport.

SXRSIVSTOR

SXRDIVSTOR

*MICROBAN® antimicrobial product protection helps keep surfaces "cleaner between cleanings" by inhibiting the growth of mold, mildew, fungus, and bacteria that cause odors and stains on the shelf surface. MICROBAN® and the MICROBAN® symbol are registered trademarks of the Microban Products Company, Huntersville, NC.

Metro incorporates several elements in its product design to support a facility's cleaning protocols:

- Microban® antimicrobial protection helps prevent the growth of stain and odor causing bacteria on the product.
- Advanced polymer and other proprietary finishes provide corrosion resistance
- Smooth rounded corners to allow for easier cleaning

Look for the "red check" symbol for this added protection.
